BLAST RESISTANT OPENABLE WINDOWS

G-P LLC's blast resistant openable windows are part of our new blast resistant production line. They meet the highest security standards and the highest blast proofing criteria, and are meant to protect occupants in facilities like embassies, military and public buildings anywhere that high level of security is required. Window can be opened in 30 seconds for emergency exit and cleaning when used as an inner or outer window system.

Blast Resistant Glass (Arena Tests)		
THREAT	PRODUCT	RESULT
50 lb. charge of TNT @ 7.5'	1" thick glass	no through openings, low hazard spall
50 lb. charge of TNT @ 15.0'	7/8" thick glass	no through openings, no spall
50 lb. charge of TNT @ 30.0'	11/16" glass	no through openings, no spall

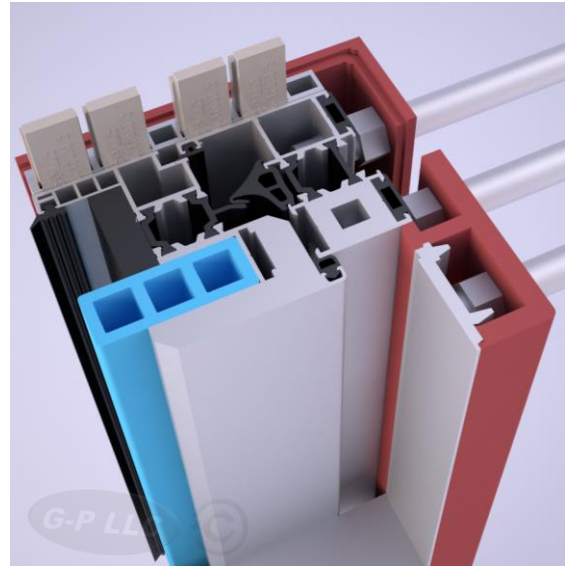

BLAST RESISTANT OPENABLE WINDOWS MAIN FEATURES

FULLY OPENABLE

Ability to completely open the window, just like a regular window.

BLASTPROOF

Fully blast resistant, thanks to our unique frame design.

CERAMIC SEALS

G-P LLC has developed first of its kind outer frame with ceramic blast absorbing seals.

PROTECTIVE BARS

When closed, the window is sealed by removable, lockable multiple bar system.
