BLAST RESISTANT SEALED WINDOWS

G-P LLC's blast resistant sealed windows are part of our new blast resistant production line. They meet the highest security standards and the highest blast proofing criteria, and are meant to protect occupants in facilities like embassies, military and public buildings anywhere that high level of security is required. What separates our product from the competition is the unique window frame design with the ceramic seals with the shock absorbing function.

Blast Resistant Glass (Arena Tests)		
THREAT	PRODUCT	RESULT
50 lb. charge of TNT @ 7.5'	1" thick glass	no through openings, low hazard spall
50 lb. charge of TNT @ 15.0'	7/8" thick glass	no through openings, no spall
50 lb. charge of TNT @ 30.0'	11/16" glass	no through openings, no spall

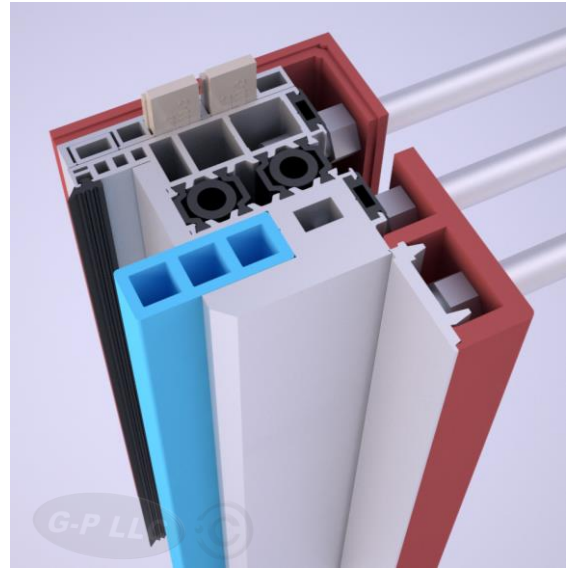

BLAST RESISTANT SEALED WINDOWS MAIN FEATURES

BLASTPROOF

Fully blast resistant, thanks to our unique frame design.

CONCRETE ANCHORS

Our concrete anchors connect outer frame to the wall, and inner frame to the outer one.

CERAMIC PLATES

G-P LLC has developed first of its kind outer frame with ceramic blast absorbing seals.

PROTECTIVE BARS

Optional inside protective bars apply additional strength to the system.
